

**Physicians, social workers, nurses, nurse practitioners, physician assistants, care managers and other health professionals from hospital systems throughout NYC have observed the unfair toll the COVID-19 crisis is having on the homeless population. Over 500 signed a letter to city and state leaders expressing concerns and recommendations.**

***While we limited signatures on the final letter to non-student frontline health professionals working in or with hospital systems in NYC and immediately surrounding areas, we wanted to thank the more than 130 other individuals who voiced their support including medical and other students, professionals from outside NYC, and others. Their names, with our deep gratitude, appear below.***
